DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Takatoshi et al. US 5,755,434. Takatoshi et al discloses a bottom removal type paper supply apparatus having a force applying means (40) which presses paper stacked on a paper support base (2), a first pickup roller (51) which is provided at an end portion of the paper support base on the side toward the body of an apparatus and which picks paper stacked on the paper support base from the bottom and transports it into the apparatus, and a second pickup roller (21) which is provided at a central portion of the paper support base and which assists the first pickup roller and transports stacked paper into the apparatus;

wherein a shutter (60) can be switched between an open state in which the stacked paper can come into contact with the second pickup roller and a closed state in which the shutter prevents contact with the second pickup roller.

The pressure can be adjusted, including as explained from column 3, line 64 to column 4, line 28.

The opening and closing of the shutter may be carried out by sensing the stack weight or a pickup miss of the first pickup roller.
